

# Sponsor a Beehive Today

Sponsor a beehive today and you can play a key part in supporting disadvantaged local communities and increasing the endangered native black bee population.

## Did you know?

Our beehives can be sponsored by individuals, as a gift, or sponsored on behalf of a school, group, or company.

With habitat destruction, climate change, and pesticides nearly destroying Britain's native black bee population, **Bees & Refugees** seek to help save them from extinction.

The bees we work with are considered equal partners and we use the best hives to ensure the best treatment of all our black bees. Our hives are designed to nurture the black bee population and specifically help keep them safe during the cold winter months.

Sponsorship money is vital for the construction and maintenance of our hives. So far, we have 22 hives, but we would love to see this number increase!

## Ways to be involved

### Who can sponsor a beehive?

Our beehives can be sponsored by individuals, as a gift, or sponsored on behalf of a school, group, or company.

### How can you sponsor a beehive?

Your sponsorship helps us fund new beehives and colonies, and will support us in looking after the beehives in a sustainable and healthy way.

We have three different sponsorship plans so you can choose the best way to get involved; each entitles you to these rewards.

Click [here](#) for more information on how to sponsor a beehive.

### About Bees & Refugees

Bees & Refugees is an environmental justice organisation introducing beekeeping as a therapeutic and community-building craft to refugee and local communities in London, whilst helping the UK's native black bee population to flourish.
